

# Health Equity & Civic Engagement

A virtual workshop with presenters  
Lynnsey Erickson and Stephanie Gyldenvand  
Community Health Strategists  
Winnebago County Health Department

Thursday, April 7, 6:30—7:45 PM

[Register here.](#)

Living conditions, institutional power, and social inequalities are factors “upstream” to the individual and impact the health of each of us. The collection of these upstream factors are defined as the Social Determinants of Health. Understanding social determinants and upstream factors helps communities identify inequities and direct priorities, policies, and resources to advance health equity and racial justice.

## Sponsored by the Equity Network

A collaboration of ESTHER, League of Women Voters of Appleton,  
People of Progression and Stronger Together Fox Valley
